ELSEVIER

Mechanisms of Ageing and Development
122 (2001) 2127–2150

mechanisms of ageing and development

www.elsevier.com/locate/mechagedev

Cumulative Subject index of volume 122

Aβ-amyloid precursor protein; Alzheimer's disease; Dementia; Genetics; Linkage; Presenilins; Apolipoprotein E **122**, 1951

Acetylcholinesterase; Alzheimer's disease; Butyrylcholinesterase; Acetylcholinesterase inhibitors; Donepezil; Rivastigmine **122**, 2057

Acetylcholinesterase; Alzheimer's disease; Molecular polymorphism; Cerebro-spinal fluid; Blood **122**, 1961

Acetylcholinesterase inhibitors; Alzheimer's disease; Acetylcholinesterase; Butyrylcholinesterase; Donepezil; Rivastigmine **122**, 2057

Acetylcholinesterase inhibitors; Alzheimer's disease; Behavioural symptoms; Atypical antipsychotics; Serotonin reuptake inhibitors **122**, 2063

Acetylcholinesterase; Na+, K+-ATPase; Mg^{2+}-ATPase; L-phenylalanine; Adult rat brain; Aged rat brain **122**, 491

Activation; IL-8; Ageing; T lymphocytes; NK cells **122**, 1383

Activation-induced cell death; Aging; $CD8^+$ T Cells; Apoptosis; Fas; Fas ligand; IFN-γ **122**, 1663

Adrenal cortex; Telomeres; Replicative senescence; Immortalization **122**, 1685

Adrenal gland; Oxidative stress; Aging; Transcription factors; AP-1; SP-1; Fos/Jun proteins; Lipopolysaccharide (LPS) **122**, 1169

Adult and fetal rat; Cultured hepatocytes; Retinoic acid; ASGP-R **122**, 31

Adult rat brain; Acetylcholinesterase; Na+, K+-ATPase; Mg^{2+}-ATPase; L-phenylalanine; Aged rat brain **122**, 491

Age; Antioxidant enzymes; Intestine; Liver; Wistar; F344 rats **122**, 561

Age; Antioxidant; Glutathione; Heart; Ischemia-reperfusion; Hemodynamic; Oxidative stress **122**, 503

Age; Chromosome aberrations; FISH; Humans **122**, 1373

Aged; Collagen; Dermal; Human; Fibroblasts; Matrix metalloproteinases; Integrins; Migration **122**, 1203

Aged rat brain; Acetylcholinesterase; Na+, K+-ATPase; Mg^{2+}-ATPase; L-phenylalanine; Adult rat brain **122**, 491

Ageing; Carnosine; Aging; Carbonyl groups; Protein glycation; Cross-links; Methylglyoxal; Diabetes **122**, 1431

Ageing; Connective Tissues; Molecular mechanisms; Collagen; Elastin **122**, 735

Ageing; Cornea; MMP-2; Wound healing **122**, 157

Ageing; DNA; Transcription factor; Human fibroblasts; AP-1 **122**, 1813

Ageing; GAP-43; Ethanol; Hippocampus; Rat **122**, 1723

Ageing; Hippocampus; Dopamine D1-like receptors; Dopamine D2-like receptors; Autoradiography; Rat **122**, 2071

PII: S0047-6374(00)00375-X

Ageing; IL-8; T lymphocytes; NK cells; Activation **122**, 1383

Ageing; Model; Biological systems; Feed-back loops; Quantitative analysis; Lifetime **122**, 271

Ageing; Morphine; Macronutrient; Body weight; Lou/c/jall rat **122**, 1825

Ageing; Multidrug resistance; *mdr*; Pgp; Murine ontogeny **122**, 255

Ageing; Polyunsaturated fatty acids; Free radical generation; Protein carbonyls; Malondialdehyde; Lipid peroxidation; Hydrogen peroxide; Carboxymethyllysine **122**, 427

Ageing; Regenerating liver; DNA polymerases; Replication and repair; Aphidicolin; ddTTP **122**, 141

Ageing; T cell; Signalling **122**, 1613

Age; Mortality; Congenital defect; AIDS; Distribution of probability of death **122**, 1865

Age-related changes; Open-field activity; Aging; Novelty; Exploration; Fischer 344 rats **122**, 1887

Age-related neurodegenerative disorders; Aggregated proteins; Brain protein oxidation **122**, 945

Aggregated proteins; Age-related neurodegenerative disorders; Brain protein oxidation **122**, 945

Aging; Apoptosis; Colonic mucosa; Cell proliferation **122**, 1849

Aging; Array; Microarray; mRNA **122**, 999

Aging; Atrial natriuretic peptide; Potassium excretion; Renal vascular resistance; Blood pressure; Diuretic **122**, 1293

Aging biomarker; Mathematical models; Survivorship; Mortality; Rate of aging; Heterogeneity **122**, 1461

Aging brain; Gene therapy; Transgene protection **122**, 1555

Aging; Calcium; Cardioprotection; Diazoxide; K-ATP channel; Senescence **122**, 1073

Aging; Caloric restriction; Leptin; Neuroendocrine; Metabolic adaptation **122**, 1511

Aging; Caloric restriction; Proteolysis **122**, 595

Aging; Cancer; Cardiovascular disease; Oxidative stress; Antioxidant; Evolution; Sphingolipids; Tumor necrosis factor **122**, 895

Aging; Cancer; Transgenic animals; Knockout animals; Mutant animals **122**, 1221

Aging; Carnosine; Ageing; Carbonyl groups; Protein glycation; Cross-links; Methylglyoxal; Diabetes **122**, 1431

Aging; cDNA expression array; Intestine; Rat **122**, 355

Aging; $CD8^+$ T Cells; Activation-induced cell death; Apoptosis; Fas; Fas ligand; IFN-γ **122**, 1663

Aging; Collagen fibers; Morphometry; Human heart **122**, 1049

Aging; Cytokine; Hormone; Neurotransmitter; Immune system; Endocrine system; Nervous system **122**, 1591

Aging; DNA damage; Comet test; Antioxidants **122**, 835

Aging; Dopamine transporter; Serotonin transporter; Nucleus accumbens **122**, 1707

Aging; Drosophila; Lifespan; Neurons **122**, 883

Aging; Endothelin receptors; Chondrocytes; Growth factors; Cytokines; Lipopolysaccharide; cAMP production **122**, 519

Aging; Fat derived peptides; Risk factors; Caloric restriction; Longevity **122**, 1565

Aging; Friend virus; Host–virus relation; T-cell subset **122**, 219

Aging; Glucose transporters; Hypobaric hypoxia; Skeletal muscle; Heart; Altitude; Insulin receptors; Development **122**, 533

Aging; Glutamate; Taurine; L-trans-PDC; Glutamate receptors; Striatum; Nucleus accumbens; Microdialysis; Rat **122**, 401

Aging; IgA; Mucosal immunity; Intestinal immunity; Cholera toxin **122**, 1397

Aging; IGF-I; Stem cells; Replicative senescence; Growth factors **122**, 1303

Aging; Interleukin-2; Exercise; Th1/Th2 balance; Stress **122**, 1135

Aging; Interleukin-1; Interleukin-2; Interleukin-6; Nutrition; SENIEUR protocol **122**, 1269

Aging; Japanese herbal medicines; Kampo-Hozai; Immune functions; NK activity; Anti-tumor effect **122**, 341

Aging mice; Lymphocytes; Thymus; Peritoneal; Spleen **122**, 1787

Aging; Mitochondrial DNA; Somatic mutations; Oxidative stress **122**, 1577

Aging; Open-field activity; Age-related changes; Novelty; Exploration; Fischer 344 rats **122**, 1887

Aging; Oxidative damage; Lipid hydroperoxide; 8-oxo-2′-deoxyguanosine; Dietary restriction; Rat skin **122**, 415

Aging; Oxidative stress; Model; Antioxidant **122**, 547

Aging; Oxidative stress; Transcription factors; Adrenal gland; AP-1; SP-1; Fos/Jun proteins; Lipopolysaccharide (LPS) **122**, 1169

Aging; Peroxidation; Linoleic acid **122**, 617

Aging; Platelet mitochondria; Pasteur effect; Lactate **122**, 823

Aging; Rats; Glucocorticoids; Dexamethasone; Plasma proteins; Protein metabolism **122**, 105

Aging; RecQ helicase; DNA repair; Topoisomerase **122**, 1107

Aging; RhoA; Gene expression; Cerebral arteries; Aorta **122**, 1757

Aging; *Saccharomyces cerevisiae*; Longevity genes; Caloric restriction; Signalling **122**, 865

Aging; SENIEUR Protocol; Immunosenescence; Chronic illness **122**, 127

Aging; Skeletal muscle; IGF-1; Excitation-contraction coupling; DHPR; Ryanodine receptor; Gene transcription **122**, 373

Aging; Skeletal muscle; Single fiber; Intact fiber; Soleus; Extensor digitorum longus; Excitation–contraction coupling; Fatigue; Sarcopenia **122**, 1019

Aging; 20S proteasome; 26S proteasome; Ubiquitin; Caloric restriction **122**, 235

Aging; Telomeres; Cell proliferation; Mosaicism; Lifetime **122**, 1361

Aging; T lymphocytes; IL-2 receptor; STATs; Tyrosine kinases; TcR/CD3 complex; Signal transduction; Proliferation; Cyclodextrin; Membrane rafts **122**, 1413

Aging; V1a receptors; Glucagon; Hepatocytes **122**, 385

AIDS; Mortality; Age; Congenital defect, Distribution of probability of death **122**, 1865

Albumin ratio; Dementia; Subcortical; White matter; Neurofilament; Tau **122**, 1937

Alkylating agents; DNA damage; Methyl methanesulfonate (MMS); Stress-activated protein kinases (SAPKs); c-Jun NH_2 terminal kinase (JNK); p38; Organ-specific response **122**, 1797

Alpha synuclein; Lewy bodies; Parkinson's disease; Protein aggregation **122**, 1499

Altitude; Glucose transporters; Hypobaric hypoxia; Skeletal muscle; Heart; Aging; Insulin receptors; Development **122**, 533

Alveolar macrophages; Recruited leukocytes; Phagocytosis; Lipid mediators; F344xBN rats **122**, 1899

Alzheimer; Biomarker; Amyloid precursor protein; Platelets **122**, 1997

Alzheimer' disease; β-Amyloid; Complement; Contact/kinin system **122**, 1971

Alzheimer's disease; Acetylcholinesterase; Butyrylcholinesterase; Acetylcholinesterase inhibitors; Donepezil; Rivastigmine **122**, 2057

Alzheimer's disease; Acetylcholinesterase; Molecular polymorphism; Cerebro-spinal fluid; Blood **122**, 1961

Alzheimer's disease; Apoptosis; Brain; Differentiation; Endothelial; Hematopoietic; Neurons; Notch; Telomerase **122**, 713

Alzheimer's disease; Behavioural symptoms; Atypical antipsychotics; Serotonin reuptake inhibitors; Acetylcholinesterase inhibitors **122**, 2063

Alzheimer's disease; Calories; Heat shock protein; Oxidative stress; Mitochondria; Neurotrophic factor; Parkinson's disease; Stroke **122**, 757

Alzheimer's disease; Cancer; Differentiation; Mitochondria; Neurons **122**, 659

Alzheimer's disease; Cerebrospinal fluid; τ; β-Amyloid; Dementia; Diagnosis **122**, 2005

Alzheimer's disease; Cholinergic approach; Cholinesterase inhibitors; Cholinergic precursors; Controlled clinical trials **122**, 2025

Alzheimer's disease; Dementia; Genetics; Linkage; Presenilins; Aβ-amyloid precursor protein; Apolipoprotein E **122**, 1951

Alzheimer's disease; Hypothalamic–pituitary–adrenal axis; Neuroendocrine stress responses **122**, 963

Alzheimer's disease; Multi-infarct dementia; Inflammatory cytokines; Antiinflammatory cytokines **122**, 1985

Alzheimer's disease; Neurodegeneration; Transgenic; *Drosophila*; *Caenorhabditis*; Polyglutamine **122**, 1639

Alzheimer's disease; Senility syndrome; Longevity; Priapism; Cancer; CBA T6/T6 mice; Death clock; Life clock; Down syndrome **122**, 173

β-Amyloid; Alzheimer' disease; Complement; Contact/kinin system **122**, 1971

β-Amyloid; Cerebrospinal fluid; τ; Alzheimer's disease; Dementia; Diagnosis **122**, 2005

Amyloid precursor protein; Alzheimer; Biomarker; Platelets **122**, 1997

anabolic hormone; endocrine function; Triodothyronine serum levels **122**, 191

Antiinflammatory cytokines; Alzheimer's disease; Multi-infarct dementia; Inflammatory cytokines **122**, 1985

Antioxidant; Age; Glutathione; Heart; Ischemia-reperfusion; Hemodynamic; Oxidative stress **122**, 503

Antioxidant; Aging; Cancer; Cardiovascular disease; Oxidative stress; Evolution; Sphingolipids; Tumor necrosis factor **122**, 895

Antioxidant; Aging; Oxidative stress; Model **122**, 547

Antioxidant enzyme; Mouse aorta; Oxidative DNA damage; Comet assay **122**, 1771

Antioxidant enzymes; Age; Intestine; Liver; Wistar; F344 rats **122**, 561

Antioxidants; DNA damage; Comet test; Aging **122**, 835

Anti-tumor effect; Japanese herbal medicines; Kampo-Hozai; Immune functions; Aging; NK activity **122**, 341

Aorta; RhoA; Gene expression; Aging; Cerebral arteries **122**, 1757

AP-1; DNA; Transcription factor; Ageing; Human fibroblasts **122**, 1813

Aphidicolin; Regenerating liver; DNA polymerases; Replication and repair; ddTTP; Ageing **122**, 141

ApoE alleles; Longevity; Nonagenarians **122**, 1367

Apolipoprotein E; Alzheimer's disease; Dementia; Genetics; Linkage; Presenilins; Aβ-amyloid precursor protein **122**, 1951

Apoptosis; Aging; $CD8^+$ T Cells; Activation-induced cell death; Fas; Fas ligand; IFN-γ **122**, 1663

Apoptosis; Aging; Colonic mucosa; Cell proliferation **122**, 1849

Apoptosis; Alzheimer's disease; Brain; Differentiation; Endothelial; Hematopoietic; Neurons; Notch; Telomerase **122**, 713

AP-1; Oxidative stress; Aging; Transcription factors; Adrenal gland; SP-1; Fos/Jun proteins; Lipopolysaccharide (LPS) **122**, 1169

Array; Microarray; Aging; mRNA **122**, 999

Arteriosclerosis; Ataxia telangiectasia; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

ASGP-R; Cultured hepatocytes; Adult and fetal rat; Retinoic acid **122**, 31

Astroglial cell cultures; Development; Maturation; Differentiation; Epidermal growth factor; Estradiol; DNA and RNA labeling **122**, 1059

Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Atrial natriuretic peptide; Potassium excretion; Renal vascular resistance; Blood pressure; Diuretic; Aging **122**, 1293

Atypical antipsychotics; Alzheimer's disease; Behavioural symptoms; Serotonin reuptake inhibitors; Acetylcholinesterase inhibitors **122**, 2063

Autoradiography; Hippocampus; Dopamine D1-like receptors; Dopamine D2-like receptors; Ageing; Rat **122**, 2071

Autoxidation; Superoxide dismutase; Lipid peroxidation; Rheology; Calf erythrocytes **122**, 69

Bcl-2; Bcl-2 Family proteins; Cellular senescence; Cell death; Cell cycle **122**, 1695

Bcl-2 Family proteins; Bcl-2; Cellular senescence; Cell death; Cell cycle **122**, 1695

Behavioural symptoms; Alzheimer's disease; Atypical antipsychotics; Serotonin reuptake inhibitors; Acetylcholinesterase inhibitors **122**, 2063

Behaviour; Thymic dipeptide; Pineal tetrapeptide; Survival; Reproductive function; Body temperature; Physical activity; Spontaneous tumours; CBA mice **122**, 41

Biological systems; Ageing; Model; Feed-back loops; Quantitative analysis; Lifetime **122**, 271

Biomarker; Alzheimer; Amyloid precursor protein; Platelets **122**, 1997

Blood; Acetylcholinesterase; Alzheimer's disease; Molecular polymorphism; Cerebro-spinal fluid **122**, 1961

Blood pressure; Atrial natriuretic peptide; Potassium excretion; Renal vascular resistance; Diuretic; Aging **122**, 1293

Blood pressure; Canola oil; Diet; Myocardium; Stereology; Rat **122**, 77

Bloom syndrome; Ataxia telangiectasia; Arteriosclerosis; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Body temperature; Thymic dipeptide; Pineal tetrapeptide; Survival; Reproductive function; Physical activity; Behaviour; Spontaneous tumours; CBA mice **122**, 41

Body weight; Long-live animals; Euthymic BALB/c-nu mice; Tumor incidence; Physiological age **122**, 477

Body weight; Morphine; Ageing; Macronutrient; Lou/c/jall rat **122**, 1825

Body weight; Survivorship; Long-live animals; Euthymic BALB/c-nu mice; Longevity prediction; Mathematical models **122**, 463

Bone density; Growth hormone (GH); Parathyroid hormone (PTH); Peripheral quantitative computed tomography (pQCT); Femoral neck; Histomorphometry; Osteopenic animal; Ovariectomy **122**, 89

Brain aging; Glutamate; Neurotransmitters interaction **122**, 1

Brain; Alzheimer's disease; Apoptosis; Differentiation; Endothelial; Hematopoietic; Neurons; Notch; Telomerase **122**, 713

Brain damage; Hypertension; Calcium antagonists; Lercanidipine; Nimodipine; Manidipine; Hydralazine **122**, 2085

Brain protein oxidation; Age-related neurodegenerative disorders; Aggregated proteins **122**, 945

Butyrylcholinesterase; Alzheimer's disease; Acetylcholinesterase; Acetylcholinesterase inhibitors; Donepezil; Rivastigmine **122**, 2057

Caenorhabditis elegans; Eukaryote; Mitochondria **122**, 1187

Caenorhabditis elegans; Heat shock; Stress experiments; Nematode worm **122**, 1477

Caenorhabditis; Neurodegeneration; Transgenic; *Drosophila*; Polyglutamine; Alzheimer's disease **122**, 1639

Calcium; Aging; Cardioprotection; Diazoxide; K-ATP channel; Senescence **122**, 1073

Calcium antagonists; Hypertension; Brain damage; Lercanidipine; Nimodipine; Manidipine; Hydralazine **122**, 2085

Calcium antagonists; Hypertension; Cerebral arteries; Microanatomy; Lercanidipine; Rat **122**, 795

Calf erythrocytes; Superoxide dismutase; Lipid peroxidation; Autoxidation; Rheology **122**, 69

Caloric restriction; Aging; Fat derived peptides; Risk factors; Longevity **122**, 1565

Caloric restriction; Aging; Leptin; Neuroendocrine; Metabolic adaptation **122**, 1511

Caloric restriction; Aging; Proteolysis **122**, 595

Caloric restriction; *Saccharomyces cerevisiae*; Aging; Longevity genes; Signalling **122**, 865

Caloric restriction; 20S proteasome; 26S proteasome; Ubiquitin; Aging **122**, 235

Calories; Alzheimer's disease; Heat shock protein; Oxidative stress; Mitochondria; Neurotrophic factor; Parkinson's disease; Stroke **122**, 757

cAMP production; Endothelin receptors; Chondrocytes; Aging; Growth factors; Cytokines; Lipopolysaccharide **122**, 519

Cancellous bone; Growth hormone; Exercise; Food restriction; pQCT; Middle-aged female F344 rats **122**, 849

Cancer; Aging; Cardiovascular disease; Oxidative stress; Antioxidant; Evolution; Sphingolipids; Tumor necrosis factor **122**, 895

Cancer; Aging; Transgenic animals; Knockout animals; Mutant animals **122**, 1221

Cancer; Alzheimer's disease; Differentiation; Mitochondria; Neurons **122**, 659

Cancer; Senility syndrome; Longevity; Priapism; CBA T6/T6 mice; Death clock; Life clock; Alzheimer's disease; Down syndrome **122**, 173

Cancer vaccines; Elderly cancer patients; Mouse models **122**, 1087

Canola oil; Diet; Blood pressure; Myocardium; Stereology; Rat **122**, 77

Carbonyl groups; Carnosine; Ageing; Aging; Protein glycation; Cross-links; Methylglyoxal; Diabetes **122**, 1431

Carboxymethyllysine; Polyunsaturated fatty acids; Free radical generation; Protein carbonyls; Ageing; Malondialdehyde; Lipid peroxidation; Hydrogen peroxide **122**, 427

Cardiac; Matrix; Senescence; Protein; Mice **122**, 1739

Cardioprotection; Aging; Calcium; Diazoxide; K-ATP channel; Senescence **122**, 1073

Cardiovascular disease; Aging; Cancer; Oxidative stress; Antioxidant; Evolution; Sphingolipids; Tumor necrosis factor **122**, 895

Carnosine; Ageing; Aging; Carbonyl groups; Protein glycation; Cross-links; Methylglyoxal; Diabetes **122**, 1431

Catalytic rate constant of an enzyme = activity per mole of enzyme; Membrane hypothesis of aging; Enzyme activities in cell aging; Enzyme activity per total protein content **122**, 811

CBA mice; Thymic dipeptide; Pineal tetrapeptide; Survival; Reproductive function; Body temperature; Physical activity; Behaviour; Spontaneous tumours **122**, 41

CBA T6/T6 mice; Senility syndrome; Longevity; Priapism; Cancer; Death clock; Life clock; Alzheimer's disease; Down syndrome **122**, 173

cDNA expression array; Aging; Intestine; Rat **122**, 355

CD8$^+$ T Cells; Aging; Activation-induced cell death; Apoptosis; Fas; Fas ligand; IFN-γ **122**, 1663

Cell cycle; Bcl-2; Bcl-2 Family proteins; Cellular senescence; Cell death **122**, 1695

Cell death; Bcl-2; Bcl-2 Family proteins; Cellular senescence; Cell cycle **122**, 1695

Cell proliferation; Aging; Apoptosis; Colonic mucosa **122**, 1849

Cell proliferation; Aging; Telomeres; Mosaicism; Lifetime **122**, 1361

Cellular senescence; Bcl-2; Bcl-2 Family proteins; Cell death; Cell cycle **122**, 1695

Centenarians; HLA; HLA-B8,DR3; Longevity **122**, 445

Central parasympathomimetic drugs; Choline alphoscerate; Cholinergic precursors; Cognitive decline; SDAT; VaD; TIA; Stroke **122**, 2041

Cerebral arteries; Hypertension; Calcium antagonists; Microanatomy; Lercanidipine; Rat **122**, 795

Cerebral arteries; RhoA; Gene expression; Aging; Aorta **122**, 1757

Cerebro-spinal fluid; Acetylcholinesterase; Alzheimer's disease; Molecular polymorphism; Blood **122**, 1961

τ; Cerebrospinal fluid; β-Amyloid; Alzheimer's disease; Dementia; Diagnosis **122**, 2005

Cerebrospinal fluid; τ; β-Amyloid; Alzheimer's disease; Dementia; Diagnosis **122**, 2005

Cerebrospinal fluid; Frontotemporal dementia; Tau; Neurofilament protein; Gangliosides; Sulfatides **122**, 1923

Cholera toxin; Aging; IgA; Mucosal immunity; Intestinal immunity **122**, 1397

Choline alphoscerate; Cholinergic precursors; Central parasympathomimetic drugs; Cognitive decline; SDAT; VaD; TIA; Stroke **122**, 2041

Cholinergic approach; Alzheimer's disease; Cholinesterase inhibitors; Cholinergic precursors; Controlled clinical trials **122**, 2025

Cholinergic precursors; Alzheimer's disease; Cholinergic approach; Cholinesterase inhibitors; Controlled clinical trials **122**, 2025

Cholinergic precursors; Choline alphoscerate; Central parasympathomimetic drugs; Cognitive decline; SDAT; VaD; TIA; Stroke **122**, 2041

Cholinesterase inhibitors; Alzheimer's disease; Cholinergic approach; Cholinergic precursors; Controlled clinical trials **122**, 2025

Chondrocytes; Endothelin receptors; Aging; Growth factors; Cytokines; Lipopolysaccharide; cAMP production **122**, 519

Chromosome aberrations; Age; FISH; Humans **122**, 1373

Chronic illness; SENIEUR Protocol; Aging; Immunosenescence **122**, 127

c-Jun NH_2 terminal kinase (JNK); DNA damage; Alkylating agents; Methyl methanesulfonate (MMS); Stress-activated protein kinases (SAPKs); p38; Organ-specific response **122**, 1797

clonal deletion; T cells; non-lymphoid organs **122**, 305

Cognitive decline; Choline alphoscerate; Cholinergic precursors; Central parasympathomimetic drugs; SDAT; VaD; TIA; Stroke **122**, 2041

Collagen; Aged; Dermal; Human; Fibroblasts; Matrix metalloproteinases; Integrins; Migration **122**, 1203

Collagen; Ageing; Connective Tissues; Molecular mechanisms; Elastin **122**, 735

Collagen fibers; Morphometry; Aging; Human heart **122**, 1049

Colonic mucosa; Aging; Apoptosis; Cell proliferation **122**, 1849

Comet assay; Mouse aorta; Antioxidant enzyme; Oxidative DNA damage **122**, 1771

Comet test; DNA damage; Antioxidants; Aging **122**, 835

Complement; Alzheimer' disease; β-Amyloid; Contact/kinin system **122**, 1971

Congenital defect; Mortality; Age; AIDS; Distribution of probability of death **122**, 1865

Connective Tissues; Ageing; Molecular mechanisms; Collagen; Elastin **122**, 735

Contact/kinin system; Alzheimer' disease; β-Amyloid; Complement **122**, 1971

Controlled clinical trials; Alzheimer's disease; Cholinergic approach; Cholinesterase inhibitors; Cholinergic precursors **122**, 2025

Cornea; Ageing; MMP-2; Wound healing **122**, 157

Cross-links; Carnosine; Ageing; Aging; Carbonyl groups; Protein glycation; Methylglyoxal; Diabetes **122**, 1431

Cultured hepatocytes; Adult and fetal rat; Retinoic acid; ASGP-R **122**, 31

Cyclin-dependent kinase inhibitors; T cell clone replicative lifespans; Oxidative DNA damage; p16; p21; p27 **122**, 1151

Cyclodextrin; T lymphocytes; IL-2 receptor; STATs; Tyrosine kinases; Aging; TcR/CD3 complex; Signal transduction; Proliferation; Membrane rafts **122**, 1413

Cytokine; Aging; Hormone; Neurotransmitter; Immune system; Endocrine system; Nervous system **122**, 1591

Cytokines; Endothelin receptors; Chondrocytes; Aging; Growth factors; Lipopolysaccharide; cAMP production **122**, 519

ddTTP; Regenerating liver; DNA polymerases; Replication and repair; Aphidicolin; Ageing **122**, 141

Death clock; Senility syndrome; Longevity; Priapism; Cancer; CBA T6/T6 mice; Life clock; Alzheimer's disease; Down syndrome **122**, 173

Dementia; Alzheimer's disease; Genetics; Linkage; Presenilins; Aβ-amyloid precursor protein; Apolipoprotein E **122**, 1951

Dementia; Cerebrospinal fluid; τ; β-Amyloid; Alzheimer's disease; Diagnosis **122**, 2005

Dementia; Homocysteine; Methylenetetrahydrofolate reductase; Folate; Vitamin B12 **122**, 2013

Dementia; Subcortical; White matter; Neurofilament; Tau; Albumin ratio **122**, 1937

Dermal; Aged; Collagen; Human; Fibroblasts; Matrix metalloproteinases; Integrins; Migration **122**, 1203

Development; Astroglial cell cultures; Maturation; Differentiation; Epidermal growth factor; Estradiol; DNA and RNA labeling **122**, 1059

Development; Glucose transporters; Hypobaric hypoxia; Skeletal muscle; Heart; Aging; Altitude; Insulin receptors **122**, 533

Development; Porifera; Homeobox-containing genes; Retinoic acid **122**, 779

Dexamethasone; Aging; Rats; Glucocorticoids; Plasma proteins; Protein metabolism **122**, 105

DHPR; Aging; Skeletal muscle; IGF-1; Excitation-contraction coupling; Ryanodine receptor; Gene transcription **122**, 373

Diabetes; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Diabetes; Carnosine; Ageing; Aging; Carbonyl groups; Protein glycation; Cross-links; Methylglyoxal **122**, 1431

Diagnosis; Cerebrospinal fluid; τ; β-Amyloid; Alzheimer's disease; Dementia **122**, 2005

Diazoxide; Aging; Calcium; Cardioprotection; K-ATP channel; Senescence **122**, 1073

Dietary restriction; Aging; Oxidative damage; Lipid hydroperoxide; 8-oxo-2′-deoxyguanosine; Rat skin **122**, 415

Diet; Canola oil; Blood pressure; Myocardium; Stereology; Rat **122**, 77

Differentiation; Alzheimer's disease; Apoptosis; Brain; Endothelial; Hematopoietic; Neurons; Notch; Telomerase **122**, 713

Differentiation; Alzheimer's disease; Cancer; Mitochondria; Neurons **122**, 659

Differentiation; Astroglial cell cultures; Development; Maturation; Epidermal growth factor; Estradiol; DNA and RNA labeling **122**, 1059

Disease; Human longevity; Gene; Life span correlation **122**, 909

Distribution of probability of death; Mortality; Age; Congenital defect; AIDS **122**, 1865

Diuretic; Atrial natriuretic peptide; Potassium excretion; Renal vascular resistance; Blood pressure; Aging **122**, 1293

DNA and RNA labeling; Astroglial cell cultures; Development; Maturation; Differentiation; Epidermal growth factor; Estradiol **122**, 1059

DNA damage; Alkylating agents; Methyl methanesulfonate (MMS); Stress-activated protein kinases (SAPKs); c-Jun NH_2 terminal kinase (JNK); p38; Organ-specific response **122**, 1797

DNA damage; Comet test; Antioxidants; Aging **122**, 835

DNA polymerases; Regenerating liver; Replication and repair; Aphidicolin; ddTTP; Ageing **122**, 141

DNA repair; RecQ helicase; Aging; Topoisomerase **122**, 1107

DNA; Transcription factor; Ageing; Human fibroblasts; AP-1 **122**, 1813

Donepezil; Alzheimer's disease; Acetylcholinesterase; Butyrylcholinesterase; Acetylcholinesterase inhibitors; Rivastigmine **122**, 2057

Dopamine D2-like receptors; Hippocampus; Dopamine D1-like receptors; Ageing; Autoradiography; Rat **122**, 2071

Dopamine D1-like receptors; Hippocampus; Dopamine D2-like receptors; Ageing; Autoradiography; Rat **122**, 2071

Dopamine transporter; Aging; Serotonin transporter; Nucleus accumbens **122**, 1707

Down syndrome; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Down syndrome; Senility syndrome; Longevity; Priapism; Cancer; CBA T6/T6 mice; Death clock; Life clock; Alzheimer's disease **122**, 173

Drosophila; Aging; Lifespan; Neurons **122**, 883

Drosophila; Neurodegeneration; Transgenic; *Caenorhabditis*; Polyglutamine; Alzheimer's disease **122**, 1639

Dyskeratosis congenita; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Elastin; Ageing; Connective Tissues; Molecular mechanisms; Collagen **122**, 735

Elderly cancer patients; Cancer vaccines; Mouse models **122**, 1087

endocrine function; anabolic hormone; Triodothyronine serum levels **122**, 191

Endocrine system; Aging; Cytokine; Hormone; Neurotransmitter; Immune system; Nervous system **122**, 1591

Endothelial; Alzheimer's disease; Apoptosis; Brain; Differentiation; Hematopoietic; Neurons; Notch; Telomerase **122**, 713

Endothelin receptors; Chondrocytes; Aging; Growth factors; Cytokines; Lipopolysaccharide; cAMP production **122**, 519

End-replication-problem; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Enzyme activities in cell aging; Membrane hypothesis of aging; Catalytic rate constant of an enzyme = activity per mole of enzyme; Enzyme activity per total protein content **122**, 811

Enzyme activity per total protein content; Membrane hypothesis of aging; Enzyme activities in cell aging; Catalytic rate constant of an enzyme = activity per mole of enzyme **122**, 811

Epidermal growth factor; Astroglial cell cultures; Development; Maturation; Differentiation; Estradiol; DNA and RNA labeling **122**, 1059

Estradiol; Astroglial cell cultures; Development; Maturation; Differentiation; Epidermal growth factor; DNA and RNA labeling **122**, 1059

Estrogen receptor; Hormone receptor; Hormonal imprinting; Newborn; Thymus; Glucocorticoid receptor **122**, 327

Ethanol; GAP-43; Ageing; Hippocampus; Rat **122**, 1723

Eukaryote; *Caenorhabditis elegans*; Mitochondria **122**, 1187

Euthymic BALB/c-nu mice; Long-live animals; Tumor incidence; Body weight; Physiological age **122**, 477

Euthymic BALB/c-nu mice; Survivorship; Long-live animals; Body weight; Longevity prediction; Mathematical models **122**, 463

Evolution; Aging; Cancer; Cardiovascular disease; Oxidative stress; Antioxidant; Sphingolipids; Tumor necrosis factor **122**, 895

Excitation-contraction coupling; Aging; Skeletal muscle; IGF-1; DHPR; Ryanodine receptor; Gene transcription **122**, 373

Excitation–contraction coupling; Aging; Skeletal muscle; Single fiber; Intact fiber; Soleus; Extensor digitorum longus; Fatigue; Sarcopenia **122**, 1019

Exercise; Aging; Interleukin-2; Th1/Th2 balance; Stress **122**, 1135

Exercise; Growth hormone; Food restriction; pQCT; Cancellous bone; Middle-aged female F344 rats **122**, 849

Exploration; Open-field activity; Aging; Age-related changes; Novelty; Fischer 344 rats **122**, 1887

Extensor digitorum longus; Aging; Skeletal muscle; Single fiber; Intact fiber; Soleus; Excitation–contraction coupling; Fatigue; Sarcopenia **122**, 1019

Fas; Aging; $CD8^+$ T Cells; Activation-induced cell death; Apoptosis; Fas ligand; IFN-γ **122**, 1663

Fas ligand; Aging; CD8$^+$ T Cells; Activation-induced cell death; Apoptosis; Fas; IFN-γ **122**, 1663

Fat derived peptides; Aging; Risk factors; Caloric restriction; Longevity **122**, 1565

Fatigue; Aging; Skeletal muscle; Single fiber; Intact fiber; Soleus; Extensor digitorum longus; Excitation–contraction coupling; Sarcopenia **122**, 1019

Feed-back loops; Ageing; Model; Biological systems; Quantitative analysis; Lifetime **122**, 271

Feeding; Mice; Glycolysis; Gluconeogenesis; Nitrogen metabolism **122**, 1033

Femoral neck; Growth hormone (GH); Parathyroid hormone (PTH); Peripheral quantitative computed tomography (pQCT); Bone density; Histomorphometry; Osteopenic animal; Ovariectomy **122**, 89

Fibroblasts; Aged; Collagen; Dermal; Human; Matrix metalloproteinases; Integrins; Migration **122**, 1203

Fischer 344 rats; Open-field activity; Aging; Age-related changes; Novelty; Exploration **122**, 1887

FISH; Age; Chromosome aberrations; Humans **122**, 1373

Folate; Dementia; Homocysteine; Methylenetetrahydrofolate reductase; Vitamin B12 **122**, 2013

Food restriction; Growth hormone; Exercise; pQCT; Cancellous bone; Middle-aged female F344 rats **122**, 849

Fos/Jun proteins; Oxidative stress; Aging; Transcription factors; Adrenal gland; AP-1; SP-1; Lipopolysaccharide (LPS) **122**, 1169

F344 rats; Age; Antioxidant enzymes; Intestine; Liver; Wistar **122**, 561

Free radical generation; Polyunsaturated fatty acids; Protein carbonyls; Ageing; Malondialdehyde; Lipid peroxidation; Hydrogen peroxide; Carboxymethyllysine **122**, 427

Friend virus; Aging; Host–virus relation; T-cell subset **122**, 219

Frontotemporal dementia; Cerebrospinal fluid; Tau; Neurofilament protein; Gangliosides; Sulfatides **122**, 1923

F344xBN rats; Alveolar macrophages; Recruited leukocytes; Phagocytosis; Lipid mediators **122**, 1899

Gangliosides; Frontotemporal dementia; Cerebrospinal fluid; Tau; Neurofilament protein; Sulfatides **122**, 1923

GAP-43; Ethanol; Ageing; Hippocampus; Rat **122**, 1723

Gene expression; RhoA; Aging; Cerebral arteries; Aorta **122**, 1757

Gene; Human longevity; Disease; Life span correlation **122**, 909

Gene therapy; Aging brain; Transgene protection **122**, 1555

Genetics; Alzheimer's disease; Dementia; Linkage; Presenilins; Aβ-amyloid precursor protein; Apolipoprotein E **122**, 1951

Gene transcription; Aging; Skeletal muscle; IGF-1; Excitation-contraction coupling; DHPR; Ryanodine receptor **122**, 373

Glucagon; V1a receptors; Hepatocytes; Aging **122**, 385

Glucocorticoid receptor; Hormone receptor; Hormonal imprinting; Newborn; Thymus; Estrogen receptor **122**, 327

Glucocorticoids; Aging; Rats; Dexamethasone; Plasma proteins; Protein metabolism **122**, 105

Gluconeogenesis; Feeding; Mice; Glycolysis; Nitrogen metabolism **122**, 1033

Glucose-6-phosphate dehydrogenase; NADP-specific isocitrate dehydrogenase; Malic enzymes; Lipid peroxidation **122**, 291

Glucose transporters; Hypobaric hypoxia; Skeletal muscle; Heart; Aging; Altitude; Insulin receptors; Development **122**, 533

Glutamate; Brain aging; Neurotransmitters interaction **122**, 1

Glutamate receptors; Glutamate; Taurine; L-trans-PDC; Striatum; Nucleus accumbens; Aging; Microdialysis; Rat **122**, 401

Glutamate; Taurine; L-trans-PDC; Glutamate receptors; Striatum; Nucleus accumbens; Aging; Microdialysis; Rat **122**, 401

Glutathione; Age; Antioxidant; Heart; Ischemia-reperfusion; Hemodynamic; Oxidative stress **122**, 503

Glycolysis; Feeding; Mice; Gluconeogenesis; Nitrogen metabolism **122**, 1033

Growth factors; Aging; IGF-I; Stem cells; Replicative senescence **122**, 1303

Growth factors; Endothelin receptors; Chondrocytes; Aging; Cytokines; Lipopolysaccharide; cAMP production **122**, 519

Growth hormone; Exercise; Food restriction; pQCT; Cancellous bone; Middle-aged female F344 rats **122**, 849

Growth hormone (GH); Parathyroid hormone (PTH); Peripheral quantitative computed tomography (pQCT); Bone density; Femoral neck; Histomorphometry; Osteopenic animal; Ovariectomy **122**, 89

Heart; Age; Antioxidant; Glutathione; Ischemia-reperfusion; Hemodynamic; Oxidative stress **122**, 503

Heart; Glucose transporters; Hypobaric hypoxia; Skeletal muscle; Aging; Altitude; Insulin receptors; Development **122**, 533

Heat shock protein; Alzheimer's disease; Calories; Oxidative stress; Mitochondria; Neurotrophic factor; Parkinson's disease; Stroke **122**, 757

Heat shock; Stress experiments; Nematode worm; *Caenorhabditis elegans* **122**, 1477

Hematopoiesis; Immortal cells; Ovarian follicles; Lifespan **122**, 1537

Hematopoietic; Alzheimer's disease; Apoptosis; Brain; Differentiation; Endothelial; Neurons; Notch; Telomerase **122**, 713

Hemodynamic; Age; Antioxidant; Glutathione; Heart; Ischemia-reperfusion; Oxidative stress **122**, 503

Hepatocytes; V1a receptors; Glucagon; Aging **122**, 385

Heterogeneity; Aging biomarker; Mathematical models; Survivorship; Mortality; Rate of aging **122**, 1461

Hippocampus; Dopamine D1-like receptors; Dopamine D2-like receptors; Ageing; Autoradiography; Rat **122**, 2071

Hippocampus; GAP-43; Ethanol; Ageing; Rat **122**, 1723

Histomorphometry; Growth hormone (GH); Parathyroid hormone (PTH); Peripheral quantitative computed tomography (pQCT); Bone density; Femoral neck; Osteopenic animal; Ovariectomy **122**, 89

HLA-B8,DR3; Centenarians; HLA; Longevity **122**, 445

HLA; Centenarians; HLA-B8,DR3; Longevity **122**, 445

Homeobox-containing genes; Porifera; Development; Retinoic acid **122**, 779

Homocysteine; Dementia; Methylenetetrahydrofolate reductase; Folate; Vitamin B12 **122**, 2013

Hormonal imprinting; Hormone receptor; Newborn; Thymus; Glucocorticoid receptor; Estrogen receptor **122**, 327

Hormone; Aging; Cytokine; Neurotransmitter; Immune system; Endocrine system; Nervous system **122**, 1591

Hormone receptor; Hormonal imprinting; Newborn; Thymus; Glucocorticoid receptor; Estrogen receptor **122**, 327

Host–virus relation; Aging; Friend virus; T-cell subset **122**, 219

Human; Aged; Collagen; Dermal; Fibroblasts; Matrix metalloproteinases; Integrins; Migration **122**, 1203

Human fibroblasts; DNA; Transcription factor; Ageing; AP-1 **122**, 1813

Human heart; Collagen fibers; Morphometry; Aging **122**, 1049

Human longevity; Gene; Disease; Life span correlation **122**, 909

Humans; Age; Chromosome aberrations; FISH **122**, 1373

Hutchinson–Gilford progeria; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Osteoporosis; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Hydralazine; Hypertension; Brain damage; Calcium antagonists; Lercanidipine; Nimodipine; Manidipine **122**, 2085

Hydrogen peroxide; Polyunsaturated fatty acids; Free radical generation; Protein carbonyls; Ageing; Malondialdehyde; Lipid peroxidation; Carboxymethyllysine **122**, 427

Hypermutation; Werner syndrome; Microsatellite instability; Immunoglobulin variable gene **122**, 1121

Hypertension; Brain damage; Calcium antagonists; Lercanidipine; Nimodipine; Manidipine; Hydralazine **122**, 2085

Hypertension; Calcium antagonists; Cerebral arteries; Microanatomy; Lercanidipine; Rat **122**, 795

Hypobaric hypoxia; Glucose transporters; Skeletal muscle; Heart; Aging; Altitude; Insulin receptors; Development **122**, 533

Hypothalamic–pituitary–adrenal axis; Alzheimer's disease; Neuroendocrine stress responses **122**, 963

IAP; LINE-1; SINE **122**, 1321

IFN-γ; Aging; $CD8^+$ T Cells; Activation-induced cell death; Apoptosis; Fas; Fas ligand **122**, 1663

IgA; Aging; Mucosal immunity; Intestinal immunity; Cholera toxin **122**, 1397

IGF-1; Aging; Skeletal muscle; Excitation-contraction coupling; DHPR; Ryanodine receptor; Gene transcription **122**, 373

IGF-I; Aging; Stem cells; Replicative senescence; Growth factors **122**, 1303

IL-8; Ageing; T lymphocytes; NK cells; Activation **122**, 1383

IL-2 receptor; T lymphocytes; STATs; Tyrosine kinases; Aging; TcR/CD3 complex; Signal transduction; Proliferation; Cyclodextrin; Membrane rafts **122**, 1413

Image analysis; Intracerebral arteries; Microanatomy; Remodeling; Morphometry; Spontaneously hypertensive rats **122**, 1257

Immortal cells; Ovarian follicles; Hematopoiesis; Lifespan **122**, 1537

Immortalization; Adrenal cortex; Telomeres; Replicative senescence **122**, 1685

Immune functions; Japanese herbal medicines; Kampo-Hozai; Aging; NK activity; Anti-tumor effect **122**, 341

Immune; Infection; Vaccination **122**, 1521

Immune system; Aging; Cytokine; Hormone; Neurotransmitter; Endocrine system; Nervous system **122**, 1591

Immunoglobulin variable gene; Werner syndrome; Microsatellite instability; Hypermutation **122**, 1121

Immunosenescence; SENIEUR Protocol; Aging; Chronic illness **122**, 127

Individual aging; Morbidity; Mortality; Ontogenesis **122**, 1447

Infection; Vaccination; Immune **122**, 1521

Inflammatory cytokines; Alzheimer's disease; Multi-infarct dementia; Antiinflammatory cytokines **122**, 1985

Insulin receptors; Glucose transporters; Hypobaric hypoxia; Skeletal muscle; Heart; Aging; Altitude; Development **122**, 533

Morphometry; Intracerebral arteries; Microanatomy; Image analysis; Remodeling; Spontaneously hypertensive rats **122**, 1257

Morphometry; Muscle aging; Succinic dehydrogenase cytochemistry; Succinic dehydrogenase activity; Mitochondrial metabolic competence; Mitochondrial plasticity **122**, 1841

Mortality; Age; Congenital defect; AIDS; Distribution of probability of death **122**, 1865

Mortality; Aging biomarker; Mathematical models; Survivorship; Rate of aging; Heterogeneity **122**, 1461

Mortality; Individual aging; Morbidity; Ontogenesis **122**, 1447

Mosaicism; Aging; Telomeres; Cell proliferation; Lifetime **122**, 1361

Mouse aorta; Antioxidant enzyme; Oxidative DNA damage; Comet assay **122**, 1771

Mouse models; Cancer vaccines; Elderly cancer patients **122**, 1087

mRNA; Array; Microarray; Aging **122**, 999

Mucosal immunity; Aging; IgA; Intestinal immunity; Cholera toxin **122**, 1397

Multidrug resistance; *mdr*; Pgp; Murine ontogeny; Ageing **122**, 255

Multi-infarct dementia; Alzheimer's disease; Inflammatory cytokines; Antiinflammatory cytokines **122**, 1985

Murine ontogeny; Multidrug resistance; *mdr*; Pgp; Ageing **122**, 255

Muscle aging; Succinic dehydrogenase cytochemistry; Succinic dehydrogenase activity; Morphometry; Mitochondrial metabolic competence; Mitochondrial plasticity **122**, 1841

Mutant animals; Aging; Cancer; Transgenic animals; Knockout animals **122**, 1221

Myelination; Transverse relaxation time; Water molecule; Magnetic resonance; Tissue Compartmentalization **122**, 1281

Myocardium; Canola oil; Diet; Blood pressure; Stereology; Rat **122**, 77

NADP-specific isocitrate dehydrogenase; Glucose-6-phosphate dehydrogenase; Malic enzymes; Lipid peroxidation **122**, 291

Na+, K+-ATPase; Acetylcholinesterase; Mg^{2+}-ATPase; L-phenylalanine; Adult rat brain; Aged rat brain **122**, 491

Natural selection; Longevity; Senescence **122**, 1651

Nematode worm; Heat shock; Stress experiments; *Caenorhabditis elegans* **122**, 1477

Nervous system; Aging; Cytokine; Hormone; Neurotransmitter; Immune system; Endocrine system **122**, 1591

Neurodegeneration; Transgenic; *Drosophila*; *Caenorhabditis*; Polyglutamine; Alzheimer's disease **122**, 1639

Neuroendocrine; Caloric restriction; Aging; Leptin; Metabolic adaptation **122**, 1511

Neuroendocrine stress responses; Hypothalamic–pituitary–adrenal axis; Alzheimer's disease **122**, 963

Neurofilament; Dementia; Subcortical; White matter; Tau; Albumin ratio **122**, 1937

Neurofilament protein; Frontotemporal dementia; Cerebrospinal fluid; Tau; Gangliosides; Sulfatides **122**, 1923

Neurons; Alzheimer's disease; Apoptosis; Brain; Differentiation; Endothelial; Hematopoietic; Notch; Telomerase **122**, 713

Neurons; Alzheimer's disease; Cancer; Differentiation; Mitochondria **122**, 659

Neurons; Drosophila; Aging; Lifespan **122**, 883

Neurotransmitter; Aging; Cytokine; Hormone; Immune system; Endocrine system; Nervous system **122**, 1591

Neurotransmitters interaction; Brain aging; Glutamate **122**, 1

Neurotrophic factor; Alzheimer's disease; Calories; Heat shock protein; Oxidative stress; Mitochondria; Parkinson's disease; Stroke **122**, 757

Newborn; Hormone receptor; Hormonal imprinting; Thymus; Glucocorticoid receptor; Estrogen receptor **122**, 327

Nimodipine; Hypertension; Brain damage; Calcium antagonists; Lercanidipine; Manidipine; Hydralazine **122**, 2085

Nitrogen metabolism; Feeding; Mice; Glycolysis; Gluconeogenesis **122**, 1033

NK activity; Japanese herbal medicines; Kampo-Hozai; Immune functions; Aging; Anti-tumor effect **122**, 341

NK cells; IL-8; Ageing; T lymphocytes; Activation **122**, 1383

Nonagenarians; ApoE alleles; Longevity **122**, 1367

non-lymphoid organs; T cells; clonal deletion **122**, 305

Notch; Alzheimer's disease; Apoptosis; Brain; Differentiation; Endothelial; Hematopoietic; Neurons; Telomerase **122**, 713

Novelty; Open-field activity; Aging; Age-related changes; Exploration; Fischer 344 rats **122**, 1887

Nucleus accumbens; Aging; Dopamine transporter; Serotonin transporter **122**, 1707

Nucleus accumbens; Glutamate; Taurine; L-trans-PDC; Glutamate receptors; Striatum; Aging; Microdialysis; Rat **122**, 401

Nutrition; Aging; Interleukin-1; Interleukin-2; Interleukin-6; SENIEUR protocol **122**, 1269

Ontogenesis; Individual aging; Morbidity; Mortality **122**, 1447

Open-field activity; Aging; Age-related changes; Novelty; Exploration; Fischer 344 rats **122**, 1887

Organ-specific response; DNA damage; Alkylating agents; Methyl methanesulfonate (MMS); Stress-activated protein kinases (SAPKs); c-Jun NH_2 terminal kinase (JNK); p38 **122**, 1797

Osteopenic animal; Growth hormone (GH); Parathyroid hormone (PTH); Peripheral quantitative computed tomography (pQCT); Bone density; Femoral neck; Histomorphometry; Ovariectomy **122**, 89

Osteoporosis; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Premature aging; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Ovarian follicles; Immortal cells; Hematopoiesis; Lifespan **122**, 1537

Ovariectomy; Growth hormone (GH); Parathyroid hormone (PTH); Peripheral quantitative computed tomography (pQCT); Bone density; Femoral neck; Histomorphometry; Osteopenic animal **122**, 89

Oxidative damage; Aging; Lipid hydroperoxide; 8-oxo-2′-deoxyguanosine; Dietary restriction; Rat skin **122**, 415

Oxidative DNA damage; Mouse aorta; Antioxidant enzyme; Comet assay **122**, 1771

Oxidative DNA damage; T cell clone replicative lifespans; Cyclin-dependent kinase inhibitors; p16; p21; p27 **122**, 1151

Oxidative stress; Age; Antioxidant; Glutathione; Heart; Ischemia-reperfusion; Hemodynamic **122**, 503

Oxidative stress; Aging; Cancer; Cardiovascular disease; Antioxidant; Evolution; Sphingolipids; Tumor necrosis factor **122**, 895

Oxidative stress; Aging; Model; Antioxidant **122**, 547

Oxidative stress; Aging; Transcription factors; Adrenal gland; AP-1; SP-1; Fos/Jun proteins; Lipopolysaccharide (LPS) **122**, 1169

Oxidative stress; Alzheimer's disease; Calories; Heat shock protein; Mitochondria; Neurotrophic factor; Parkinson's disease; Stroke **122**, 757

Oxidative stress; Mitochondrial DNA; Somatic mutations; Aging **122**, 1577

8-oxo-2′-deoxyguanosine; Aging; Oxidative damage; Lipid hydroperoxide; Dietary restriction; Rat skin **122**, 415

Parathyroid hormone (PTH); Growth hormone (GH); Peripheral quantitative computed tomography (pQCT); Bone density; Femoral neck; Histomorphometry; Osteopenic animal; Ovariectomy **122**, 89

Parkinson's disease; Alpha synuclein; Lewy bodies; Protein aggregation **122**, 1499

Parkinson's disease; Alzheimer's disease; Calories; Heat shock protein; Oxidative stress; Mitochondria; Neurotrophic factor; Stroke **122**, 757

Pasteur effect; Aging; Platelet mitochondria; Lactate **122**, 823

p38; DNA damage; Alkylating agents; Methyl methanesulfonate (MMS); Stress-activated protein kinases (SAPKs); c-Jun NH_2 terminal kinase (JNK); Organ-specific response **122**, 1797

Peripheral quantitative computed tomography (pQCT); Growth hormone (GH); Parathyroid hormone (PTH); Bone density; Femoral neck; Histomorphometry; Osteopenic animal; Ovariectomy **122**, 89

Peritoneal; Aging mice; Lymphocytes; Thymus; Spleen **122**, 1787

Peroxidation; Linoleic acid; Aging **122**, 617

Pgp; Multidrug resistance; *mdr*; Murine ontogeny; Ageing **122**, 255

Phagocytosis; Alveolar macrophages; Recruited leukocytes; Lipid mediators; F344xBN rats **122**, 1899

L-phenylalanine; Acetylcholinesterase; $Na+$, $K+$-ATPase; Mg^{2+}-ATPase; Adult rat brain; Aged rat brain **122**, 491

Physical activity; Thymic dipeptide; Pineal tetrapeptide; Survival; Reproductive function; Body temperature; Behaviour; Spontaneous tumours; CBA mice **122**, 41

Physiological age; Long-live animals; Euthymic BALB/c-nu mice; Tumor incidence; Body weight **122**, 477

Pineal tetrapeptide; Thymic dipeptide; Survival; Reproductive function; Body temperature; Physical activity; Behaviour; Spontaneous tumours; CBA mice **122**, 41

Plasma proteins; Aging; Rats; Glucocorticoids; Dexamethasone; Protein metabolism **122**, 105

Platelet mitochondria; Aging; Pasteur effect; Lactate **122**, 823

Platelets; Alzheimer; Biomarker; Amyloid precursor protein **122**, 1997

Polyglutamine; Neurodegeneration; Transgenic; *Drosophila*; *Caenorhabditis*; Alzheimer's disease **122**, 1639

Polyunsaturated fatty acids; Free radical generation; Protein carbonyls; Ageing; Malondialdehyde; Lipid peroxidation; Hydrogen peroxide; Carboxymethyllysine **122**, 427

Porifera; Homeobox-containing genes; Development; Retinoic acid **122**, 779

Potassium excretion; Atrial natriuretic peptide; Renal vascular resistance; Blood pressure; Diuretic; Aging **122**, 1293

pQCT; Growth hormone; Exercise; Food restriction; Cancellous bone; Middle-aged female F344 rats **122**, 849

Premature aging; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Senescence; Telomerase; Telosome; Werner syndrome **122**, 695

Presenilins; Alzheimer's disease; Dementia; Genetics; Linkage; Aβ-amyloid precursor protein; Apolipoprotein E **122**, 1951

Priapism; Senility syndrome; Longevity; Cancer; CBA T6/T6 mice; Death clock; Life clock; Alzheimer's disease; Down syndrome **122**, 173

Proliferating cell nuclear antigen; Werner syndrome; Replication protein A **122**, 921

Proliferation; T lymphocytes; IL-2 receptor; STATs; Tyrosine kinases; Aging; TcR/CD3 complex; Signal transduction; Cyclodextrin; Membrane rafts **122**, 1413

Protein aggregation; Alpha synuclein; Lewy bodies; Parkinson's disease **122**, 1499

Protein carbonyls; Polyunsaturated fatty acids; Free radical generation; Ageing; Malondialdehyde; Lipid peroxidation; Hydrogen peroxide; Carboxymethyllysine **122**, 427

Protein; Cardiac; Matrix; Senescence; Mice **122**, 1739

Protein glycation; Carnosine; Ageing; Aging; Carbonyl groups; Cross-links; Methylglyoxal; Diabetes **122**, 1431

Protein metabolism; Aging; Rats; Glucocorticoids; Dexamethasone; Plasma proteins **122**, 105

Proteolysis; Aging; Caloric restriction **122**, 595

p27; T cell clone replicative lifespans; Oxidative DNA damage; Cyclin-dependent kinase inhibitors; p16; p21 **122**, 1151

p21; T cell clone replicative lifespans; Oxidative DNA damage; Cyclin-dependent kinase inhibitors; p16; p27 **122**, 1151

p16; T cell clone replicative lifespans; Oxidative DNA damage; Cyclin-dependent kinase inhibitors; p21; p27 **122**, 1151

Quantitative analysis; Ageing; Model; Biological systems; Feed-back loops; Lifetime **122**, 271

Rat; Aging; cDNA expression array; Intestine **122**, 355

Rat; Canola oil; Diet; Blood pressure; Myocardium; Stereology **122**, 77

Rate of aging; Aging biomarker; Mathematical models; Survivorship; Mortality; Heterogeneity **122**, 1461

Rat; GAP-43; Ethanol; Ageing; Hippocampus **122**, 1723

Rat; Glutamate; Taurine; L-trans-PDC; Glutamate receptors; Striatum; Nucleus accumbens; Aging; Microdialysis **122**, 401

Rat; Hippocampus; Dopamine D1-like receptors; Dopamine D2-like receptors; Ageing; Autoradiography **122**, 2071

Rat; Hypertension; Calcium antagonists; Cerebral arteries; Microanatomy; Lercanidipine **122**, 795

Rats; Aging; Glucocorticoids; Dexamethasone; Plasma proteins; Protein metabolism **122**, 105

Rat skin; Aging; Oxidative damage; Lipid hydroperoxide; 8-oxo-2′-deoxyguanosine; Dietary restriction **122**, 415

RecQ helicase; Aging; DNA repair; Topoisomerase **122**, 1107

Recruited leukocytes; Alveolar macrophages; Phagocytosis; Lipid mediators; F344xBN rats **122**, 1899

Regenerating liver; DNA polymerases; Replication and repair; Aphidicolin; ddTTP; Ageing **122**, 141

Regeneration; Mitochondria; Membrane potential; Senescence **122**, 205

Remodeling; Intracerebral arteries; Microanatomy; Image analysis; Morphometry; Spontaneously hypertensive rats **122**, 1257

Renal vascular resistance; Atrial natriuretic peptide; Potassium excretion; Blood pressure; Diuretic; Aging **122**, 1293

Replication and repair; Regenerating liver; DNA polymerases; Aphidicolin; ddTTP; Ageing **122**, 141

Replication protein A; Werner syndrome; Proliferating cell nuclear antigen **122**, 921

Replicative senescence; Adrenal cortex; Telomeres; Immortalization **122**, 1685

Replicative senescence; Aging; IGF-I; Stem cells; Growth factors **122**, 1303

Reproductive function; Thymic dipeptide; Pineal tetrapeptide; Survival; Body temperature; Physical activity; Behaviour; Spontaneous tumours; CBA mice **122**, 41

Retinoic acid; Cultured hepatocytes; Adult and fetal rat; ASGP-R **122**, 31

Retinoic acid; Porifera; Homeobox-containing genes; Development **122**, 779

Rheology; Superoxide dismutase; Lipid peroxidation; Autoxidation; Calf erythrocytes **122**, 69

RhoA; Gene expression; Aging; Cerebral arteries; Aorta **122**, 1757

Risk factors; Aging; Fat derived peptides; Caloric restriction; Longevity **122**, 1565

Rivastigmine; Alzheimer's disease; Acetylcholinesterase; Butyrylcholinesterase; Acetylcholinesterase inhibitors; Donepezil **122**, 2057

Ryanodine receptor; Aging; Skeletal muscle; IGF-1; Excitation-contraction coupling; DHPR; Gene transcription **122**, 373

Saccharomyces cerevisiae; Aging; Longevity genes; Caloric restriction; Signalling **122**, 865

Sarcopenia; Aging; Skeletal muscle; Single fiber; Intact fiber; Soleus; Extensor digitorum longus; Excitation–contraction coupling; Fatigue **122**, 1019

SDAT; Choline alphoscerate; Cholinergic precursors; Central parasympathomimetic drugs; Cognitive decline; VaD; TIA; Stroke **122**, 2041

Senescence; Aging; Calcium; Cardioprotection; Diazoxide; K-ATP channel **122**, 1073

Senescence; Ataxia telangiectasia; Arteriosclerosis; Bloom syndrome; Diabetes; Down syndrome; Dyskeratosis congenita; End-replication-problem; Hutchinson–Gilford progeria; Osteoporosis; Premature aging; Telomerase; Telosome; Werner syndrome **122**, 695

Senescence; Cardiac; Matrix; Protein; Mice **122**, 1739

Senescence; Mitochondria; Membrane potential; Regeneration **122**, 205

Senescence; Natural selection; Longevity **122**, 1651

SENIEUR Protocol; Aging; Immunosenescence; Chronic illness **122**, 127

SENIEUR protocol; Aging; Interleukin-1; Interleukin-2; Interleukin-6; Nutrition **122**, 1269

Senility syndrome; Longevity; Priapism; Cancer; CBA T6/T6 mice; Death clock; Life clock; Alzheimer's disease; Down syndrome **122**, 173

Serotonin reuptake inhibitors; Alzheimer's disease; Behavioural symptoms; Atypical antipsychotics; Acetylcholinesterase inhibitors **122**, 2063

Serotonin transporter; Aging; Dopamine transporter; Nucleus accumbens **122**, 1707

Signalling; *Saccharomyces cerevisiae*; Aging; Longevity genes; Caloric restriction **122**, 865

Signalling; T cell; Ageing **122**, 1613

Signal transduction; T lymphocytes; IL-2 receptor; STATs; Tyrosine kinases; Aging; TcR/CD3 complex; Proliferation; Cyclodextrin; Membrane rafts **122**, 1413

SINE; IAP; LINE-1 **122**, 1321

Single fiber; Aging; Skeletal muscle; Intact fiber; Soleus; Extensor digitorum longus; Excitation–contraction coupling; Fatigue; Sarcopenia **122**, 1019

Skeletal muscle; Aging; IGF-1; Excitation-contraction coupling; DHPR; Ryanodine receptor; Gene transcription **122**, 373

Skeletal muscle; Aging; Single fiber; Intact fiber; Soleus; Extensor digitorum longus; Excitation–contraction coupling; Fatigue; Sarcopenia **122**, 1019

Skeletal muscle; Glucose transporters; Hypobaric hypoxia; Heart; Aging; Altitude; Insulin receptors; Development **122**, 533

Soleus; Aging; Skeletal muscle; Single fiber; Intact fiber; Extensor digitorum longus; Excitation–contraction coupling; Fatigue; Sarcopenia **122**, 1019

Somatic mutations; Mitochondrial DNA; Oxidative stress; Aging **122**, 1577

Sphingolipids; Aging; Cancer; Cardiovascular disease; Oxidative stress; Antioxidant; Evolution; Tumor necrosis factor **122**, 895

Spleen; Aging mice; Lymphocytes; Thymus; Peritoneal **122**, 1787

Spontaneously hypertensive rats; Intracerebral arteries; Microanatomy; Image analysis; Remodeling; Morphometry **122**, 1257

Spontaneous tumours; Thymic dipeptide; Pineal tetrapeptide; Survival; Reproductive function; Body temperature; Physical activity; Behaviour; CBA mice **122**, 41

SP-1; Oxidative stress; Aging; Transcription factors; Adrenal gland; AP-1; Fos/Jun proteins; Lipopolysaccharide (LPS) **122**, 1169

26S proteasome; 20S proteasome; Ubiquitin; Aging; Caloric restriction **122**, 235

20S proteasome; 26S proteasome; Ubiquitin; Aging; Caloric restriction **122**, 235

STATs; T lymphocytes; IL-2 receptor; Tyrosine kinases; Aging; TcR/CD3 complex; Signal transduction; Proliferation; Cyclodextrin; Membrane rafts **122**, 1413

Stem cells; Aging; IGF-I; Replicative senescence; Growth factors **122**, 1303

Stereology; Canola oil; Diet; Blood pressure; Myocardium; Rat **122**, 77

Stress-activated protein kinases (SAPKs); DNA damage; Alkylating agents; Methyl methanesulfonate (MMS); c-Jun NH_2 terminal kinase (JNK); p38; Organ-specific response **122**, 1797

Stress; Aging; Interleukin-2; Exercise; Th1/Th2 balance **122**, 1135

Stress experiments; Heat shock; Nematode worm; *Caenorhabditis elegans* **122**, 1477

Striatum; Glutamate; Taurine; L-trans-PDC; Glutamate receptors; Nucleus accumbens; Aging; Microdialysis; Rat **122**, 401

Stroke; Alzheimer's disease; Calories; Heat shock protein; Oxidative stress; Mitochondria; Neurotrophic factor; Parkinson's disease **122**, 757

Stroke; Choline alphoscerate; Cholinergic precursors; Central parasympathomimetic drugs; Cognitive decline; SDAT; VaD; TIA **122**, 2041

Subcortical; Dementia; White matter; Neurofilament; Tau; Albumin ratio **122**, 1937

Succinic dehydrogenase activity; Muscle aging; Succinic dehydrogenase cytochemistry; Morphometry; Mitochondrial metabolic competence; Mitochondrial plasticity **122**, 1841

Succinic dehydrogenase cytochemistry; Muscle aging; Succinic dehydrogenase activity; Morphometry; Mitochondrial metabolic competence; Mitochondrial plasticity **122**, 1841

Sulfatides; Frontotemporal dementia; Cerebrospinal fluid; Tau; Neurofilament protein; Gangliosides **122**, 1923

Superoxide dismutase; Lipid peroxidation; Autoxidation; Rheology; Calf erythrocytes **122**, 69

Survival; Thymic dipeptide; Pineal tetrapeptide; Reproductive function; Body temperature; Physical activity; Behaviour; Spontaneous tumours; CBA mice **122**, 41

Survivorship; Aging biomarker; Mathematical models; Mortality; Rate of aging; Heterogeneity **122**, 1461

Survivorship; Long-live animals; Euthymic BALB/c-nu mice; Body weight; Longevity prediction; Mathematical models **122**, 463
